UNMATCHED SERVICE

At Amphenol Canada, we deliver exceptional service and unmatched capabilities through our Micro-D Connectors, providing tailored solutions to meet our customers' needs with precision and efficiency.

- **Rapid Customization:** Your customers benefit from fast service and a wide range of custom design options, including *flex circuits*, *RF/Coax contacts*, *power contacts*, and *fiber optics*.
- **Competitive Pricing Agreements:** Provide your customers with high-quality, customized connectors at competitive prices that offer outstanding value.
- **Comprehensive Value-Add Options:** Enhance customer satisfaction with value-add features like *backshells* that offer EMI protection and strain relief, designed with various exit options—including angled, round, and elliptical ports—to meet their unique application requirements.

PRICING

Amphenol Canada's Micro-D pricing is highly competitive, often the lowest in the market. Our extensive cost-reductions have resulted in lower pricing, enhancing our sales channel presence, particularly in distribution.

NEED FILTERING?

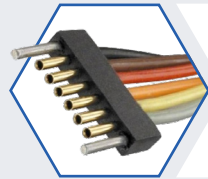

Tackle EMI with Amphenol's low-pass filter connectors. Our solderless, space-saving designs ensure top performance and reliability.

Available for **all** Amphenol Canada products.

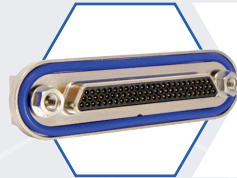

INNOVATIVE STANDARDS

Amphenol's Micro-D Connectors exceed US military standards (M83513) and deliver optimal performance. Our innovative approach offers a wide range of customizable interconnect solutions, matching all competitor offerings and providing [Infinite Possibilities](#).
