

200 BOX MAG-MATE TERMINALS

INSULATION DISPLACEMENT CONTACT (IDC) MAGNET WIRE TERMINALS FOR COMPACT MOTOR SYSTEMS

TE Connectivity developed the 200 box MAG-MATE terminals to help electric motor manufacturers design more compact motor systems. These terminals take up to 30% less volume than 300 box MAG-MATE terminals and are compatible with a wide range of copper and aluminum magnet wire sizes. They feature insulation displacement contact (IDC) technology to create a reliable, gas-tight contact that can be assembled efficiently and cost-effectively using automated tooling.

ELECTRICAL

- Rated Voltage: Based on customer application
- Rated Current: Based on wire range
- Wire Sizes (AWG)
 - Copper wire: 30-21
 - Aluminum wire: 26-20

MATERIALS

- Base: Brass
- Plating: Tin

FEATURES

- Space-saving design suited for compact motor systems
- Compatible with 30-21AWG copper and 26-20AWG aluminum magnet wire
- IDC magnet wire contact creates a reliable, cost-effective and efficient connection
