

NEW NANO MAG-MATE TERMINALS

ACCOMMODATE FINE COPPER MAGNET WIRE FOR MOTORS

PRODUCT DESCRIPTION

MAG-MATE Terminals are insulation displacement connection (IDC) terminals for copper magnet wire terminations. Our new Nano MAG-MATE Terminals now accommodate single or double wire termination 30-40 AWG (0.08-0.25mm dia.) copper magnet wires.

Our space-saving 1.5 mm pitch Nano MAG-MATE Terminals utilize IDC technology to provide solderless termination that allows for full automation of the termination process - reducing labor costs and increasing operational efficiency. Eliminating the need for soldering or welding also reduces the risk of potentially damaging heat-sensitive wiring and/or emitting chemical fumes.

Nano MAG-MATE Terminals provide a clean, reliable and cost-effective solution ideal for small motor, stepper motor, or small coil applications.
