Specialist Distributor of Interconnect & Passive Electronic
Components, Discrete Semiconductors, &
Electro-Mechanical Devices

TTI Customer,

TTI has carefully reviewed your request for information on the electronic components acquired from us regarding RoHS 2011/65/EU, WEEE, REACH or other initiatives concerning hazardous material content. As the provider of these products to you, we, in turn, have requested the required information from our component manufacturers. As a distributor, TTI does not have the detailed information available to respond to such requests directly.

The component manufacturers have informed us that the appropriate solution is to request the hazardous material information directly from them. Therefore, TTI has asked the relevant factories to respond directly to you. Please send your request to them directly. If you do not have a factory contact, our local TTI office will provide you with the name of the factory representative to contact and any reference information available.

As an additional aid in helping customers determine the component manufacturer's position, transition plans or product information, TTI has added links to all available RoHS information from our suppliers at our Environmental Issues web site:
https://www.tti.com/content/ttiinc/en/about/environment/rohs.html

Manufacturers have made it clear that distributors are not authorized to provide such detailed and complex data to the end customer.

Respectfully,

Stephen Summers
Environmental Compliance
