Country of Origin of Raw Materials

Thank you for your continued business with Industrial Devices Company in Panasonic Corporation.(PID).

This letter is to inform you of PID's efforts in response to the investigation request on the country of origin for certain raw materials such as conflict minerals.

Although some of PID's products use the raw materials you have inquired, based on the investigation on PID's suppliers, PID has obtained no information to date that such raw materials originate from the conflict areas such as Congo. Meanwhile, PID procures raw materials from its suppliers pursuant to the terms and conditions in line with the Green Procurement Principle of Panasonic Group, and confirms that such transaction satisfies corporate social responsibility through its periodical audit.

PID appreciates your kind understanding of its efforts. As the specific details of the inventory level or procurement channel for the said raw material and the future procurement plan fall within the scope of PID's trade secret, PID would like to decline further disclosure of such information.

The Applicable Products : Multilayer :

Electric Double Layer Capacitors  
Aluminium Electrolytic Capacitors  
(Radial Lead Type, Surface Mount Type, Snap-in Type)  
Speciality Polymer Aluminium Electrolytic Capacitors

Contained raw material : Tin (Sn)
