ABOUT AMPHENOL RF

Amphenol RF is the largest manufacturer of radio frequency connectors, coaxial adapters and RF cable assemblies in the world. With a global team of experienced engineers, Amphenol RF is able to offer the broadest portfolio of standard RF products on the market today. Our engineering capabilities extend to custom product development to meet the challenges of design-specific constraints.

Amphenol RF has a global footprint of operations in North America, Europe and Asia.

WIRELESS INFRASTRUCTURE AND 5G OVERVIEW

Wireless infrastructure is the hardware backbone of mobile and fixed wireless networks. 5G, the next generation of mobile network standards, promises high data rates to enable low-latency applications including safe autonomous driving and 4K video streaming to smartphones.

Amphenol RF is prepared for 5G, with innovative new RF product lines as well as industry standard products. Connectors, adapters and cable assemblies from Amphenol RF include high density, low cost, and robust products to enable the wireless infrastructure evolution.

LOW PIM SOLUTIONS

PIM, or Passive Intermodulation, refers to interfering signals that diminish the performance of wireless networks. Amphenol RF offers low PIM products including HD-EFI, N-Type, PSMP, SMP, SMPM, 2.2/5, 4.3/10, and 7/16 connector series, as well as cable assemblies and adapters.

APPLICATIONS OVERVIEW

BASE STATION ANTENNAS

Macro base stations have evolved to be more efficient with Massive MIMO antennas. Many antenna elements and other components in a compact housing, coupled with technologies like beamforming, vastly improve coverage and capacity per antenna.

MIMO ANTENNAS

MIMO or "Multiple-Input Multiple-Output" refers to antenna technology that expands radio capacity by sending and receiving multiple data signals simultaneously over the same channel.

SMALL CELLS

Small cells are short-range radio nodes that supplement macro base stations and create local wireless networks. Dense installations of small cells will be elemental to 5G, providing significantly increased network capacity and support of high data rates.

WIRELESS BACKHAUL

Backhaul units connect local or "edge" networks to a core network. Wireless units are instrumental in servicing low-coverage areas where fiber optic cabling is prohibitive. Backhaul can also help handle rising mobile data rates.

DISTRIBUTED ANTENNA SYSTEMS

Distributed Antenna Systems (DAS) are networks of antenna nodes that increase wireless coverage in areas of high user volumes or low line-of-sight to infrastructure. Stadiums and underground transportation are common DAS applications.

FIXED WIRELESS BROADBAND

Access points mounted outside of buildings and residences enable wireless Internet access for end users. These units connect to wireless infrastructure, eliminating hard wired access to Internet services at consumer premises.

MOBILE DEVICES

End users gain access to mobile networks and the Internet through wireless devices. User mobile devices include smartphones, tablets, laptops, and hotspots. 5G technology will expand mobile applications to 4K video streaming, virtual reality, and more.

MASSIVE IOT

IoT or the "Internet of Things" refers to the connection of objects to the Internet. 5G will enable IoT at massive scales, driving data transfer and analytics in applications from smart cities to industrial automation.

CRITICAL COMMUNICATIONS

Mission-critical communication requires high bandwidth, low latency data transfer. Historically, only wired protocols have achieved these features. 5G technology is predicted to enable wireless critical communications for industrial automation and more.

WIRELESS MODULES

Embedded wireless modules enable devices to send and receive data. Modules house components in a standard package, making it easier for manufacturers to integrate wireless connectivity into devices from smart appliances to industrial controls.

ENGINEERING CAPABILITIES

As a leader in the design and manufacturing of RF interconnect products, Amphenol RF understands that every application is unique. When standard products don't match your needs, our dedicated team of engineers can develop the ideal solution for any application, in any industry.

With a global presence, Amphenol RF has experienced engineers in North America, Europe and Asia, and production capabilities in China, Mexico and the United States. Our quality team oversees the entire process from initial design through delivery, to ensure your satisfaction.

OUR ENGINEERING SERVICES INCLUDE:

Ganged Connector Solutions

Custom Cable Assemblies

Mixed Signal Applications

Modifications of Existing Designs

Application Specific Optimized Return Loss

PCB Launch Optimization

OUR ENGINEERING TOOLBOX INCLUDES:

Pro/Engineer 3D Mechanical Design

ANSOFT HFSS 3D RF Analysis

ANSYS 3D Mechanical Analysis

Agilent Vector Network Analyzers

PRODUCT REFERENCE GUIDES

2.2/5 PRODUCT SERIES

225-101P-52S

225-100J-52S

Overview

Amphenol RF's line of 2.2/5 connectors are a compact version of the previously released 4.3/10 connector series, with a 53% smaller footprint. This connector series is lightweight and can accommodate thick, low loss cables up to a half inch. The robust design makes these connectors ideal for both indoor and outdoor applications.

The 2.2/5 connector series is designed to meet the needs of applications which require low PIM in order to avoid interference in network quality during high speed data transmission. It offers flexibility in installation with the ability to blind mate.

Features and Benefits

- Excellent low PIM performance
- Lightweight, compact design
- Optimized for 1/4, 3/8 and 1/2 inch corrugated cables
- Ideal for outdoor applications

Applications

- Small Cells
- Mobile Networks
- Distributed Antenna Systems (DAS)
- Low Power Base Stations
- In-Building Architecture
- MIMO Antennas
- Test & Measurement

Excellent PIM Performance <-166 dBc

2.2/5 PRODUCT SERIES

Technical Specifications

Electrical

Impedance		50 Ω
Frequency Range		DC - 20 GHz
Dielectric Withstanding Voltage		1500 VRMS
PIM (Passive Intermodulation)		- 166 dBc @ 2 x 20 W
Return Loss	Interface	DC-3 GHz: 38 dB, 3-6 GHz: 36 dB
	Cable Connector (typ)	DC-4 GHz: 33 dB, 4-6 GHz: 30 dB
Power Handling		250 W (2 GHz) @ 40°C

Mechanical

Mating Cycles		100 Min
Recommended Torque (Screw Type)		3 Nm

Environmental

Temperature Range		-40°C to +85°C
-------------------	--	----------------

Materials

Body		Brass, Albaloy Plating
Insulator		PTFE, Natural
Inner Contact		Beryllium Copper, Silver Plating
Outer Contact		Beryllium Copper, Albaloy Plating

Size Comparison

2.2/5 Series

4.3/10 Series

7/16 Series

4.3/10 CONNECTOR SERIES

4.3/10 connectors offer the same robust design as 7/16 connectors but are smaller and up to 40% lighter, allowing for much more dense, lighter weight applications. These designs are IP67 compliant for protection against dust and water ingress in outdoor applications, and provide excellent VSWR performance up to 6 GHz. Separate electrical and mechanical components yield very stable PIM performance regardless of coupling torque, allowing for easier installation. Silver plated contacts and white bronze plated bodies offer a high degree of conductivity, corrosion resistance and durability.

FEATURES & BENEFITS

Ideal for applications requiring low PIM and low attenuation

White bronze plated bodies & silver contacts offer high degree of conductivity, corrosion resistance, and durability

Same robust design as 7/16 connectors, but smaller and up to 40% lighter

IP67 compliant to protect against dust and water ingress

For more 4.3/10 connectors, visit:

7/16 CONNECTOR SERIES

The 7/16 series name derives from the metric dimensions of the connector interface: 7mm OD of inner contact, 16 mm ID of outer contact. These connectors provide superior performance for both return loss and intermodulation distortion (IMD).

These connectors are extremely robust and stable and offer waterproof options, making them ideal for applications where vibration resistance and environmental protection is important. Because they are designed to minimize signal distortion from intermodulation, 7/16 connectors are especially suitable for base stations and broadcast communication systems.

FEATURES & BENEFITS

Low IMD and low VSWR provides improved system performance

Self-flaring design ensures ease of installation with standard hand tool

Pre-assembled gasket protects against dust and water (IP67) per IEC 169

Silver-plated contacts and silver or white bronze-plated bodies deliver a high conductivity and corrosion resistance

For more 7/16 connectors, visit:

AFI CONNECTOR SERIES

The AFI connector series is a solution for board-to-board RF applications, where a bullet adapter is embedded into the plug side of the PCB solution.

The AFI interface utilizes a proprietary configuration that allows for “float” to compensate for axial and radial misalignment due to packaging tolerances. This results in a maximum misalignment allowed by the system of 0.030” [0.8 mm] radial and 0.040” [1.0 mm] axial.

The interface is available in two configurations: 75 Ω with a performance of DC to 3 GHz and 50 Ω with a performance of DC to 6 GHz.

FEATURES & BENEFITS

Two-piece board-to-board interconnect with built-in bullet adapter

Robust float system compensates for up to 0.031” radial and 0.040” axial misalignment

Suitable for blindmate or multiple board-to-board applications

For more AFI connectors, visit:

<https://www.amphenolrf.com/connectors/afi.html>

AMC PRODUCT SERIES

Overview

Amphenol Micro Coaxial (AMC) connectors are low profile (2.5mm mating height) with an extremely small footprint (3mm x 3mm). Their space-saving design makes these connectors an optimal solution for portable and mobile devices. AMC connectors are fully compatible with the Hirose U.FL series.

Standard AMC Jumper Cables are available and in stock at many of the most common distributors. These jumpers offer an AMC right angle plug to AMC right angle plug on industry standard black 0.81mm, 1.13mm, 1.32mm, and 1.37mm Micro-Coaxial Cable. Custom solutions available upon request.

Features and Benefits

- Supports high frequency transmission from DC to 6GHz
- Ideal for applications where space and weight are a concern
- Easy snap on/off mating
- Surface mount allows for higher PC board densities and automated pcb placement

Applications

- Antennas
- Bluetooth
- GPS
- WLAN
- Cellular and Mobile Devices
- Tablets and Notebook Computers

AMC4 CONNECTOR SERIES

The AMC4 (Amphenol Micro Coaxial, 4th Generation) connector series is a low profile (0.6 mm off the board) series with an extremely small board footprint (2 mm x 2 mm). This series is used in applications with 50 Ω impedance requirements, and has frequency performance from DC to 6 GHz. The coupling style of the AMC4 connector series is snap-on for secure and easy mating.

FEATURES & BENEFITS

Ultra low profile, 0.6 mm

Small foot print (2 mm x 2 mm)

Easy snap-on/snap-off mating

100% compatible with IPEX MH4 and Murata HSC

AMMC PRODUCT SERIES

Overview

Amphenol Micro Miniature Coaxial (AMMC) connectors are low profile (1.4 mm mated height) with an extremely small footprint (2 mm x 2 mm). Their space-saving design makes these connectors an optimal solution for portable and mobile devices. AMMC connectors are fully compatible with the Hirose W.FL and IPEX MHF III series.

Standard AMMC Jumper Cables are available and in stock at many of the most common distributors. These jumpers offer an AMMC right angle plug to AMMC right angle plug on industry standard black 0.81mm and 1.13mm Micro-Coaxial Cable. Custom solutions available upon request.

Features and Benefits

- Supports high frequency transmission from DC to 6GHz
- Ideal for applications where space and weight are a concern
- Easy snap on/off mating
- Surface mount allows for higher PC board densities and automated pcb placement

Applications

- Antennas
- Bluetooth
- GPS
- WLAN
- Cellular and Mobile Devices
- Tablets and Notebook Computers

Cable Outer Conductor	Annealed copper wire braid, silver plated	

HD-EFI PRODUCT SERIES

Overview

The HD-EFI product series is a micro-miniature interface designed to allow large board tolerance stack ups, blind mating, and multiple RF lines. This is achieved by maximizing radial and axial float while maintaining high frequency RF performance.

HD-EFI PCB jacks are available in through-hole, surface mount, and edge launch designs. The three-piece mating system uses a limited detent and a smooth bore PCB connector, joined by a floating bullet adapter in between. The generous gathering cone and unique bullet design allows for 1.4mm of axial float, and 1.4mm of radial float, with a maximum float angle of 5 degrees.

These 50 ohm products have an operating frequency of DC to 6 GHz, making them ideal for high-performance applications with a small package size. The selection of PCB mounts and bullet lengths offer versatility for board launches and PCB stacking configurations.

HD-EFI bullet adapters are uniquely designed to provide a crash-proof mating, facilitated by the extension of the insulator beyond the adapter body. Used in conjunction with the smooth bore connectors, the mating system allows for easy alignment and a secure connection.

Features and Benefits

- Designed to maximize radial and axial float in board-to-board applications
- Available in through-hole, surface mount, and edge launch configurations
- Provides crash-proof mating

Applications

- Wireless Base Station Equipment
- Backplane Design
- Multiple Board to Board Connections
- Complex PCB Stack-ups

MCX CONNECTOR SERIES

The MCX (Micro Coaxial) series is a 50 Ω & 75 Ω series with broadband capability ranging from DC to 6 GHz. The MCX series features secure, fast and easy snap-on/snap-off coupling. MCX connectors were introduced in the 1980s and conform to the European CECC 22220 spec. This series is the ideal solution for designs where weight and physical space are limited.

FEATURES & BENEFITS

Broadband performance with low reflection DC to 6 GHz

Quick connect/disconnect snap-on mating

Accommodates a wide range of miniature RG flexible coaxial and semi-rigid cable

50 Ω & 75 Ω solutions available

For more MCX Connectors, visit:

<https://www.amphenorlf.com/connectors/mcx.html>

MMCX CONNECTOR SERIES

The MMCX (Micro-Miniature Coaxial) connector series is a micro-miniature version of the MCX. It has all the same features of the MCX series, including 50 Ω impedance with a broadband capability of DC to 6 GHz, secure, fast and easy snap-on/snap-off coupling and a wide range of available connectors. However, MMCX connectors have a smaller footprint than the MCX series.

Like the MCX, the MMCX series conforms to the European CECC 22000 specification.

A full range of MMCX connectors are available, including surface mount, edge card, and cable connectors.

FEATURES & BENEFITS

Broadband performance with low reflection DC to 6 GHz, providing a high-quality solution at a low cost

Quick connect/disconnect snap-on mating reduces installation time

Conforms to European CECC 22000 specifications

Available in straight and right angle plugs and printed circuit board connectors

For more MMCX Connectors, visit:

<https://www.amphenolrf.com/connectors/mmcx.html>

N TYPE CONNECTOR SERIES

N-Type connectors are designed to satisfy the need for a durable, weatherproof, medium-size RF connector with consistent performance through 18 GHz. Our N-Type connectors feature threaded coupling mechanisms and are fully interchangeable with N-Type connectors made to the MIL-C-39012 specification. These connectors are used in systems where excellent RF and mechanical performance is critical.

FEATURES & BENEFITS

Broad line of military, industrial and commercial grade products available

Excellent RF performance from DC to 18 GHz

Threaded coupling mechanism ideal for vibration resistance

PSMP CONNECTOR SERIES

Amphenol RF PSMP connectors are the perfect solution for board-to-board applications requiring high power. With a minimum board spacing of 12.6 mm, the three-piece design allows maximum flexibility for high-density board spacing, and is an ideal solution for blindmate situations.

PSMP connectors are the best combination of SMPs and SMAs. They are compact, board-to-board designs capable of high-performance and high-frequency, with low PIM capabilities. The PSMP has the exact same PCB footprint as the SMP, allowing for easy conversion of applications for higher power handling.

FEATURES & BENEFITS

20 W @ 2.2 GHz continuous power

High Frequency operation up to 10 GHz

12.6 mm minimum board spacing

Axial misalignment: +/- 1 mm

For more PSMP connectors, visit:

<https://www.amphenolrf.com/connectors/psmp.html>

QMA CONNECTOR SERIES

The QMA connector is a quick disconnect version of the SMA connector and shares the same internal construction, which allows the connector to have excellent performance up to 6 GHz. Because of the innovative coupling mechanism, a 360-degree butt joint is maintained resulting in low RF leakage. Since the RF line is identical to the SMA series, the QMA connectors also offer the same high power handling capability. This gives the series significant advantages over other quick disconnect connectors.

FEATURES & BENEFITS

Snap-on interface for quick and easy installation

Rotatable 360 degrees after connection for flexibility with installation

High power handling capability

For more QMA connectors, visit:

<https://www.amphenorrf.com/connectors/qma.html>

SMA CONNECTOR SERIES

Using a threaded interface, SMA 50 Ω ohm connectors are semi-precision units that provide excellent electrical performance from DC to 26.5 GHz and outstanding mechanical durability. SMA connectors feature stainless steel or brass construction and $\frac{1}{4}$ - 36 threaded coupling, which offers high performance in a compact design. For phase array radar, test equipment, ILS landing systems and other instrumentation using phase matching techniques, SMA interconnects offer a precise and simple means of phase adjustment for microwave devices. Built in accordance with MIL-C-39012 and CECC 2110/111, SMA connectors can be mated with all connectors that meet these specification mating diameters regardless of manufacturer.

FEATURES & BENEFITS

Lightweight, compact and vibration proof design

Low cost commercial grade (brass SMA) available in nickel or gold plating

Terminates to all standard flexible coaxial cables, low-loss (LMR) type cables and industry standard semi-rigid and conformable cables

For more SMA Connectors, visit:

<https://www.amphenolrf.com/connectors/sma.html>

SMP CONNECTOR SERIES

The SMP interface is a micro-miniature interface in the same scale as MMCX connectors but offers a frequency range of DC to 40 GHz. It is commonly used in miniaturized high frequency coaxial modules and is offered in both push-on and snap-on mating styles.

The available detent systems, full and limited, provide respective levels of engagement/disengagement forces. This family of interconnects addresses all package design needs. It can be utilized as a highly shielded interconnect for high data rate applications or in a board-to-board system using a floating bullet. This floating bullet provides a link between mated pairs compensating for both radial and axial misalignment.

Available in a cable-to-board mated pair, the plug side can be configured either right angle or straight with termination capability to 0.047" and 0.086" semi-rigid and conformable, or other flexible coax. The receptacles are designed for surface, through hole, or end launch mounting.

FEATURES & BENEFITS

RF performance DC to 40 GHz

Designed to accommodate both radial and axial misalignment

Push-on and snap-on mating styles for quick installation

For more SMP Connectors, visit:

<https://www.amphenolrf.com/connectors/smp.html>

SMPPM CONNECTOR SERIES

The SMPPM interface is a micro-miniature interface with a frequency range of DC to 65 GHz. It is commonly used in miniaturized high frequency coaxial modules and is offered in both push-on and snap-on mating styles.

The full detent and smooth bore mating systems provide respective levels of engagement/disengagement forces. This family of interconnects addresses all package design needs; it can be utilized as a highly shielded interconnect for high data rate applications or in a board-to-board system using a floating bullet. This floating bullet provides a link between mated pairs compensating for both radial and axial misalignment.

Available in a cable-to-board mated pair, the plug side can be configured either right angle or straight with termination capability to 0.047" and 0.086" semi-rigid and conformable, or other flexible coax. The receptacles are designed for surface, through hole, or end launch mounting.

FEATURES & BENEFITS

Superior RF performance DC to 65 GHz

Small package size

Push-on and snap-on mating styles for quick installation

For more SMPPM connectors, visit:

<https://www.amphenolrf.com/connectors/smpm.html>

Tee-adapters available

COAXIAL ADAPTERS SERIES

1.0/2.3 ADAPTERS

DIN 1.0/2.3 products feature a patented ultra-slim push-pull coupling system which allows for quick installation and ensures positive locking and high retention. This series is available in 50 and 75 ohm configurations and operates from DC to 10 GHz. The compact design makes them ideal for applications with space constraints.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242229-75	1.0/2.3 Jack	BNC Jack	Straight	75	Bulkhead
242231-75	1.0/2.3 Jack	BNC Plug	Straight	75	Bulkhead
APH-HD-ISO-1023	1.0/2.3 Jack	HD-BNC Jack	Straight	75	Bulkhead, Isolated
242218	1.0/2.3 Jack	N-Type Jack	Straight	50	
901-10005	1.0/2.3 Jack	SMA Plug	Straight	50	
242207	1.0/2.3 Jack	SMA Plug	Straight	50	
242238-75	1.0/2.3 Plug	BNC Jack	Straight	75

242179	1.0/2.3 Plug	SMA Jack	Straight	50	

[VIEW ALL 1.0/2.3 ADAPTERS](#)

4.1/9.5 ADAPTERS

The 4.1/9.5 series is a mechanically robust and high performance solution for wireless applications which require low passive intermodulation (PIM) and attenuation.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242281	4.1/9.5 Jack	N-Type Plug	Straight	50	
242277	4.1/9.5 Jack	7/16 Plug	Straight	50	
242282	4.1/9.5 Plug	N-Type Jack	Straight	50	
242278	4.1/9.5 Plug	7/16 Jack	Straight	50	

[VIEW ALL 4.1/9.5 ADAPTERS](#)

4.3/10 ADAPTERS

4.3/10 products offer the same robust design as 7/16 connectors but with a smaller footprint. Their lightweight design makes them ideal for wireless applications that require denser connector packing. This series is rated IP67 compliant and offers low passive intermodulation (PIM) and attenuation.

4.3/10 to 4.3/10					
Part Number	Side 1	Side 2	Orientation	Impedance	Features
AD-4310J4310J-2	4.3/10 Jack	4.3/10 Jack	Straight	50	Bulkhead

[VIEW ALL 4.3/10 ADAPTERS](#)

7/16 ADAPTERS

The 7/16 product series offers superior performance for both return loss and intermodulation distortion (IMD). These interconnects are robust and ideal for applications where vibration resistance and environmental protection is important. They are especially suitable for base stations and broadcast communication systems.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242278	7/16 Jack	4.1/9.5 Plug	Straight	50	
AD-716J4310J-1	7/16 Jack	4.3/10 Jack	Straight	50

AMC ADAPTERS

The AMC (Amphenol Micro Coaxial) product series is low profile (2.5 mm of the board) with an extremely small footprint (3 mm x 3 mm). This series utilizes a snap-on/snap-off connector style for secure and easy mating.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242225	AMC Jack	MMCX Jack	Straight	50	
242216	AMC Jack	N-Type Jack	Straight	50	Bulkhead

COAXIAL ADAPTERS SERIES

BNC ADAPTERS

The BNC product series offers a diverse array of commercial and military grade options in terms of both configuration and termination style. The BNC features a bayonet coupling mechanism for positive, quick mating and un-mating. These miniature connectors are lightweight and reliable, and suited to accommodate PCB and cable-mount applications.

COAXIAL ADAPTERS SERIES

FAKRA ADAPTERS

FAKRA products are designed specifically for automotive applications according to USCAR standards. This series features color coded housings and mechanical keying to prevent mis-mating and are available in sealed, high-speed and 6 GHz options.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
APH-FKJ-SMAJ	FAKRA Jack	SMA Jack	Straight	50	

[VIEW ALL FAKRA ADAPTERS](#)

FME ADAPTERS

The FME product series offers excellent VSWR performance from DC to 200 MHz. These products are ideal for mobile antenna applications and are primarily used with RG-58 coaxial cables.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
192104	FME Plug	BNC Plug	Straight	50	
192103	FME Plug	FME Plug	Straight	50

COAXIAL ADAPTERS SERIES

G-TYPE ADAPTERS

The G-Type product series is a 75 ohm solution ideal for cable television (CATV), set top boxes and cable models. This series is a traditional slide-on alternative to the threaded F-Type connector.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
531-40119	G-Type Plug	G-Type Plug	Straight	75	Bulkhead

[VIEW ALL G-TYPE ADAPTERS](#)

HD-BNC ADAPTERS

The HD-BNC product line features the trusted push and turn interface of a traditional BNC but with a footprint that is 4 times smaller. These products are engineered to enhance electrical and mechanical performance and use the same prep and termination specifications of legacy broadcast connectors.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
031-70541-12G	HD-BNC Jack	BNC Plug	Straight	75	
APH-HD-ISO-1023	HD-BNC Jack	1.0/2.3 Jack	Straight	75	Bulkhead, Isolated
APH-BNCJ-HDBNCJ	HD-BNC Jack	BNC Jack	Straight	75	
APH-HD-ISO-BNC	HD-BNC Jack	BNC Jack	Straight	75	Bulkhead, Isolated
APH-BNCP-HDBNCJ	HD-BNC Jack	BNC Plug	Straight	75	
APH-HD-ISO-HD	HD-BNC Jack	HD-BNC Jack	Straight	75	Bulkhead, Isolated
APH-HDBNCJ-J	HD-BNC Jack	HD-BNC Jack	Straight	75	
034-1109-12G	HD-BNC Jack	HD-BNC Jack	Straight	75	Bulkhead
034-1110-12G	HD-BNC Jack	HD-BNC Jack	Straight	75	Bulkhead, Isolated
034-1112-12G	HD-BNC Jack	HD-BNC Jack	Right-Angle	75	
APH-HDBNCP-J	HD-BNC Jack	HD-BNC Plug	Straight	75	
031-1111-12G	HD-BNC Jack	HD-BNC Plug	Straight	75	
APH-NJ-HDBNCJ	HD-BNC Jack	N-Type Jack	Straight	75	
APH-NP-HDBNCJ	HD-BNC Jack	N-Type Plug	Straight	75	
APH-HDBNCJ-SMAJ	HD-BNC Jack	SMA Jack	Straight	50	
031-70540-12G	HD-BNC Plug	BNC Jack	Straight	75	
APH-BNCJ-HDBNCP	HD-BNC Plug	BNC Jack	Straight	75	
APH-BNCP-HDBNCP	HD-BNC Plug	BNC Plug	Straight	75	
034-1113-12G	HD-BNC Plug	HD-BNC Plug	Straight	75	
APH-NJ-HDBNCP	HD-BNC Plug	N-Type Jack	Straight	75	
APH-NP-HDBNCP	HD-BNC Plug	N-Type Plug	Straight	75	
APH-HDBNCP-SMAJ	HD-BNC Plug	SMA Jack	Straight	50	
APH-HDBNCP-SMAP	HD-BNC Plug	SMA Plug	Straight	50

HD-EFI ADAPTERS

The HD-EFI product series is a micro-miniature board-to-board solutions designed to allow large board tolerance stack ups, blind mating, and multiple RF lines. HD-EFI interconnects are available in a variety of configurations and has a generous “float” to compensate for radial and axial misalignment. The HD-EFI is ideal for high-performance applications with a small package size.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
920-505A-51S	HD-EFI Plug	HD-EFI Plug	Straight	50	
920-506A-51S	HD-EFI Plug	HD-EFI Plug	Straight	50	
920-509A-51S	HD-EFI Plug	HD-EFI Plug	Straight	50

COAXIAL ADAPTERS SERIES

HN-TYPE ADAPTERS

The HN-Type product line features medium sized, weatherproof units designed for high voltage applications. These products are designed with a captivated contact to prevent contact recession under extreme temperatures and mechanical stresses.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
000-11050 (UG-1019/U)	HN-Type Jack	HN-Type Jack	Straight	50	
000-16075	HN-Type Jack	N-Type Plug	Straight	50	
000-16050	HN-Type Plug	N-Type Jack	Straight	50

MCX ADAPTERS

The MCX (Micro Coaxial) series is a 50 ohm series with broadband capabilities ranging from DC to 6 GHz. This series features secure, fast and easy snap-on/snap-off coupling and are ideal for applications where weight and physical space are limited.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242206	MCX Jack	BNC Jack	Straight	50	
242203	MCX Jack	BNC Plug	Straight	50	
252171	MCX Jack	MCX Jack	Straight	50	Bulkhead
252169	MCX Jack	MCX Jack	Straight	50	
242172	MCX Jack	N-Type Jack	Straight	50	
242170	MCX Jack	N-Type Plug	Straight	50	
242129	MCX Jack	SMA Jack	Straight	50	
242126	MCX Jack	SMA Plug	Straight	50	
242208	MCX Jack	TNC Plug	Straight	50	
242204	MCX Plug	BNC Jack	Straight	50	
242205	MCX Plug	BNC Plug	Straight	50	
242171	MCX Plug	N-Type Jack	Straight	50	
APH-SMAJ-MCXP	MCX Plug	SMA Jack	Straight	50	
242234	MCX Plug	SMA Jack	Straight	50	2-Hole Flange
242127	MCX Plug	SMA Jack	Straight	50	
242128	MCX Plug	SMA Plug	Straight	50	
242210	MCX Plug	TNC Plug	Straight	50

MHV ADAPTERS

The MHV product series features bayonet locking interconnects used for high voltage applications up to 5000 volts. These products off a quick-connect functionality that is used where transmission of high voltage is required.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
000-12650	MHV Jack	MHV Jack	Straight	Non-Constant	4-Hole Flange

[VIEW ALL MHV ADAPTERS](#)

MINI-SMB ADAPTERS

Amphenol RF's Mini-SMB connector family provides broadband capabilities up to 2 GHz. Their simple snap-on design offers a quick connect/disconnect and utilizes die cast components in non-critical areas to provide a low cost solution. These products also feature reduced housing which allows for circuit miniaturization and efficient space utilization.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
142249-75	Mini-SMB Jack	Mini-SMB Jack	Straight	75	Bulkhead

[VIEW ALL MINI-SMB ADAPTERS](#)

COAXIAL ADAPTERS SERIES

MINI-UHF ADAPTERS

Miniature versions of UHF connectors, Mini-UHF connectors are designed for applications where size, weight, and cost factors are critical. With a miniature 3/8-24 thread size, these connectors provides excellent RF performance for applications up to 2.5 GHz. Connectors in this series terminate are available as crimp-type cable plugs and jacks, terminating to various cable types, and as panel and printed circuit board receptacles.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242119	Mini-UHF Jack	SMA Jack	Straight	50	Bulkhead
242116	Mini-UHF Jack	SMA Plug	Straight	50	
242197	Mini-UHF Jack	TNC Plug	Straight	50	
242117	Mini-UHF Plug	SMA Jack	Straight	50

242153	Mini-UHF Plug	TNC Jack	Straight	50	

[VIEW ALL MINI-UHF ADAPTERS](#)

MMCX ADAPTERS

The MMCX (Micro-Miniature Coaxial) product series is a micro-miniature version of the MCX. It has all the same features and benefits of the traditional MCX, but with a smaller footprint.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242225	MMCX Jack	AMC Jack	Straight	50	
262130	MMCX Jack	MMCX Jack	Straight	50	Bulkhead
262129	MMCX Jack	MMCX Jack	Straight	50	
262136	MMCX Jack	MMCX Plug	Straight	50	
242168	MMCX Jack	N-Type Jack	Straight	50	
242166	MMCX Jack	N-Type Plug	Straight	50	
242237	MMCX Jack	SMA Jack	Straight	50	Bulkhead
242143	MMCX Jack	SMA Jack	Straight	50	
242140	MMCX Jack	SMA Plug	Straight	50	
242169	MMCX Plug	N-Type Plug	Straight	50	
242141RP	MMCX Plug	RP-SMA Jack	Straight	50	
242193	MMCX Plug	SMA Jack	Straight	50	Bulkhead
242141	MMCX Plug	SMA Jack	Straight	50	
242142	MMCX Plug	SMA Plug	Straight	50

N-TYPE ADAPTERS

The N-Type product series is a durable, medium sized, weatherproof solution for military, industrial and commercial applications. The threaded coupling mechanism featured on all N-Type products is ideal for vibration resistance.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
082-101 (UG-29B/U)	N-Type Jack	N-Type Jack	Straight	50	
172123	N-Type Jack	N-Type Jack	Straight	50	
082-6348	N-Type Jack	N-Type Jack	Straight	50	Bulkhead
082-66 (UG-30/U)	N-Type Jack	N-Type Jack	Straight	50	Bulkhead, IP67
082-66-RFX	N-Type Jack	N-Type Jack	Straight	50	Bulkhead
172124	N-Type Jack	N-Type Jack	Straight	50	Bulkhead
172278-10	N-Type Jack	N-Type Jack	Straight	50	4-Hole Flange

COAXIAL ADAPTERS SERIES

Part Number	Side 1	Side 2	Orientation	Impedance	Features
172276	N-Type Jack	N-Type Plug	Straight	50	
172336	N-Type Jack	N-Type Plug	Straight	50	Bulkhead
172126	N-Type Jack	N-Type Plug	Right Angle	50	
082-64 (UG-27A/U)	N-Type Jack	N-Type Plug	Right Angle	50

COAXIAL ADAPTERS SERIES

RP-N TYPE ADAPTERS

The N-Type product series is a durable, medium sized, weatherproof solution for military, industrial and commercial applications. The threaded coupling mechanism featured on all N-Type products is ideal for vibration resistance. N-Type interconnects are produced in standard and reverse polarity.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
172213RP	RP-N-Type Jack	N-Type Plug	Straight	50	Bulkhead
172212RP	RP-N-Type Plug	N-Type Plug	Straight	50	
172193RP-RP	RP-N-Type Plug	RP-N-Type Jack	Right Angle	50	

[VIEW ALL RP-N TYPE ADAPTERS](#)

RP-SMA ADAPTERS

The SMA product series is designed using a threaded interface and provides excellent electrical performance from DC to 26.5 GHz, along with outstanding mechanical durability. SMA interconnects offer a precise and simple means of phase adjustment for microwave devices. The products are available in standard and reverse polarity.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242201RP	RP-SMA Jack	AMC Jack	Straight	50	Bulkhead
242141RP	RP-SMA Jack	MMCX Jack	Straight	50

SMB ADAPTERS

The SMB product series features a snap-on coupling mechanism and is available in 50 and 75 ohm configurations. These interconnects offer broadband performance with low reflection from DC to 4 GHz and utilize die cast components on non-critical areas to provide a low cost solution.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242186	SMA Jack	BNC Jack	Straight	50	
242184	SMB Jack	BNC Plug	Straight	50

SMC ADAPTERS

The SMC interface features a threaded coupling mechanism and it available in 50 and 75 ohm configurations. These interconnects offer broadband performance with low reflection from DC to 10 GHz. They are ideal for telecommunications and instrumentation applications.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242176	SMC Jack	SMA Jack	Straight	50

SMP ADAPTERS

The SMP product series features a subminiature interface in the same scale as the MMCX but with a frequency range of DC to 40 GHz. These interconnects are available in multiple configurations with both push-on and snap-on mating styles. The product family can be utilized as a highly shielded interconnect for high data rate applications for in a board-to-board system using a floating bullet which compensates for radial and axial misalignment.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
AD-SMAPSMPJ-1	SMP Jack	SMA Plug	Straight	50

COAXIAL ADAPTERS SERIES

SMMP ADAPTERS

The SMMP product series features a micro-miniature interface with excellent electrical performance up to 65 GHz. SMMP interconnects are commonly used in miniaturized high frequency coaxial modules and are available in a variety of configurations and termination styles.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
925-165A-51S	SMMP Plug	SMMP Plug	Straight	50	
925-142A-51S	SMMP Plug	SMMP Plug	Straight	50	
925-141A-51S	SMMP Plug	SMMP Plug	Straight	50	Bulkhead

SSMA ADAPTERS

The SSMA product series is designed with a threaded coupling mechanism and is essentially a scaled down version of the SMA. SSMA interconnects are characterized by their compactness, high frequency bandwidth and reliable mechanical performance.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242189	SSMA Jack	SMA Plug	Straight	50	

[VIEW ALL SSMA ADAPTERS](#)

SSMB ADAPTERS

The SSMB product series is a smaller version of the standard SMB connector. This interface provides excellent electrical performance with a micro-miniature footprint. The compact design makes it ideal for applications with space constraints.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242200	SSMB Jack	SMA Plug	Straight	50	
242200-10	SSMB Jack	SMA Plug	Straight	50

COAXIAL ADAPTERS SERIES

TRIAX ADAPTERS

Triax interconnects are ideal for applications where maximum RF shielding and minimum noise radiation is required. They are designed for harsh environments with high temperature, and can be tested and approved for use in nuclear reactor chambers.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
031-8356-2	Triax Jack	Triax Jack	Straight	Non-Constant	Bulkhead
000-53225	Triax Jack	Triax Jack	Straight	Non-Constant	Bulkhead

[VIEW ALL TRIAX ADAPTERS](#)

TWINAX ADAPTERS

Twinax interconnects are designed with improved shielding characteristics and are primarily used in balanced low level and high sensitivity circuits. These products feature a keyway polarization to ensure system integrity and prevent signals from being mixed, making them ideal for computer network applications.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
082-5588-RFX	Twinax Jack	Twinax Jack	Straight	Non-Constant	
000-7925-RFX	Twinax Jack	Twinax Jack	Straight	Non-Constant	Bulkhead

[VIEW ALL TWINAX ADAPTERS](#)

UHF ADAPTERS

The UHF product series features general purpose units developed for use in low frequency systems. UHF interconnects are designed with a threaded coupling mechanism and solderable screw-on termination feature which requires no specialized crimping tools.

Part Number	Side 1	Side 2	Orientation	Impedance	Features
242165	UHF Jack	BNC Jack	Straight	Non-Constant	
242134	UHF Jack	BNC Plug	Straight	Non-Constant	Bulkhead
