

MLO™ Tight Tolerance Inductors **AVX RF**

The Multilayer Organic Tight Tolerance Inductor is a low profile organic based inductor that can support mobile communications, satellite applications, GPS, matching networks, and collision avoidance. The MLO™ Tight Tolerance Inductor series of components are based on AVX's patented multilayer organic technology (US patent 6,987,307). MLO™ Tight Tolerance Inductors incorporate very low loss organic materials which allow for high Q and high stability over frequency. MLO™ Tight Tolerance Inductors are surface mountable and are expansion matched to FR4 printed wiring boards. MLO™ Tight Tolerance Inductors utilize fine line high density interconnect technology thereby allowing for tight tolerance control and high repeatability. Reliability testing is performed to JEDEC and mil standards. Finishes are available in RoHS compliant Sn.
