

# Han-Modular® Domino

Pushing Performance

## Description

It is a pleasure to introduce the Han-Modular® Domino modules as the next development stage of the modular connectors. The new series primarily meets the industry's requirements for saving installation space and weight. Users of Han-Modular® Domino modules can save up to 50% installation space by integrating different transmission types in one module.

## Links to Other Materials

- [Next Level of Modularization](#)
- [Product Information B2B](#)

## Specs

- Power up to 16amps, 600V
- Up to 16 pins per domino
- Up to Cat.6A per domino
- IEC 60664-1
- IEC 61984
- UL 1977
- Flammability V-0
- RoHS Compliant

## Markets

- Machinery
- Robotics
- Intralogistics
- Power Industries

## Applications

- Packaging Equipment
- Paper Processing Machines
- Conveyor Systems
- Metal Forming
- Injection Molding
- Test and Measurement Systems
- Semiconductor Processing
- Control Cabinets

## Benefits at a Glance

Smaller and lighter connectors allow **space savings of up to 50%**

**Reduction of installation times** by combining several individual connections

**Maximum flexibility** and scalability to respective need

**Sustainability** through consistent modularization
