Application Tooling Line Card

molex

Application Tooling

Molex Application Tooling keeps your lines running. TTI is your source for the right tools for your operation, from pneumatic tools and benchtop machines for high-volume production lines to hand tools and manual press tools to accommodate a full range of connector and terminal styles. Increase efficiency and make sure you're producing quality connections.

Reach your local sales team at 1.800.CALL.TTI

The Right Tools to Increase Your Productivity

Molex's applicators will process in most of the industry-standard bench-top presses and wire processors in the marketplace, with production rates as high as 3,000 terminations per hour for discrete wire, depending on the application. Molex hand tools and snap-on modules mount to common pistol- or bench-mounted holders, and can be changed easily to accommodate a range of different connector and terminal styles. TTI delivers the application tooling to make sure you make the right connection, every time.
