# OMRON Switches Do you know about them?

OMRON switches have a proven track record in many of our familiar applications. Our customers appreciate their “click feeling,” “durability,” and “ease of design.”

## Three reasons why customers choose OMRON switches

### 1 Good Feeling A Satisfying Click

OMRON has established a technology to create an “**exquisite operational feeling**” by adding several parameters in addition to load and stroke. The wide variation of the feeling **improves the operability of the customer’s equipment.**

### 2 Long Life Strong durability and long life switching

OMRON has achieved “**strong durability**” through its proprietary switch production technologies accumulated over more than 80 years, as well as through its technologies for properly adjusting and managing these technologies. Please consider OMRON products for **applications that require long-life switching.**

### 3 Easy Design Less variation, easy equipment design

Over the years, OMRON has refined its technology for adjusting changes in characteristics of each process from raw materials to finished products by feeding back to the previous process, thereby making switches with “**negligible variation between individuals or lots.**” We help our customers to **design their devices more easily.**
