

# ams OSRAM Optical Solutions

## Product Line Card

ams

OSRAM

The best of both worlds has been lighting up the optoelectronics universe since ams (global sensor leader) and OSRAM (global LED leader) merged to offer vast, new technology in high-performance lighting and sensing solutions.

As a result of this powerful partnership, TTI, a long-time distributor of OSRAM components, has added ams sensor products to its broad and deep inventory, offering a more innovative, efficient, reliable and complete solution for your sensing and optical imaging designs. They're on the shelves and ready to ship today.

Reach your local sales team at 1.800.CALL.TTI

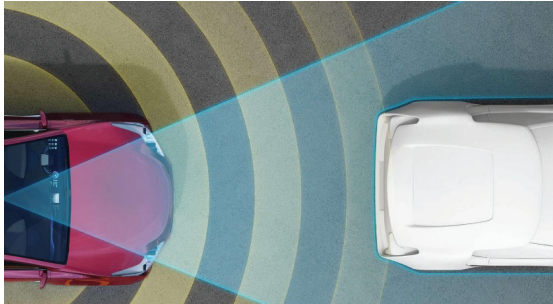

ams OSRAM world-class sensing and optical imaging components deliver industry-leading reliability and performance with the highest level of miniaturization, integration, accuracy, sensitivity and lower power for the automotive, eMobility, lighting, industrial and medical markets.

**Featured Products:**

White/Color LEDs  
 IR LEDs  
 UV-C LEDs  
 Photodiodes

Phototransistors  
 Color and IR Lasers  
 Temperature Sensors  
 Position Sensors

Proximity Sensors  
 Time of Flight Sensors  
 Spectral Sensors  
 Camera Modules

**Mobility**

**Industrial Controls**

**Process Automation**

**Medical**

**Lighting Controls**

**Specialty Sensing**

ams sensors and OSRAM LED products are now integrated into one company and TTI offers these complementary products as a part of our ready-to-ship inventory to ensure systems are perfectly matched for consistent performance across your entire application.
