

Connectors for Motorsport and Racing

SOURIAU

Connectors for Motorsport and Racing

Typical Applications

SOURIAU designs connectors for critical systems in the harshest environments. Major Motorsport players trust SOURIAU's expertise and industrial excellence.

Engine

Data Acquisition System

Steering Wheel

Telemetry & Network

Fuel Tank

Energy Recovery System

SOURIAU support your design with innovative solutions

SOURIAU Technical Solutions

A wide range of standard and derived products for motorsport.

Lightweight
High density layouts, miniature sizes,
integrated backshell, composite shell.

Quick release
Frequent disconnect.
Difficult areas to reach.

Power distribution
High voltage, high current.
High power up to 850A.

Sensors
Extreme vibration.
Restricted areas.

RELIABLE and CUSTOMIZED Solutions

Based on standard series:

- 8STA & 8TA Series
Derived from MIL-DTL-38999 & JN1003
- 8D Series
MIL-DTL-38999 Series III
- *microComp*® Series

Custom solutions
Innovative solutions.
Let your need take the lead.

Engine control unit
High power load, critical function.
Extremely reliable in harsh environments.

Fuel pump
Fuel, oils and lubricant immersion.
Extremely reliable in continuous immersion.

Unique Capability

Connectors for Motorsport and Racing

SOURIAU services

- High levels of finished connector stock from our worldwide distributors
- Due to the constant innovative needs from the Motorsport market, SOURIAU is dedicated to produce derived products on demand.

New website and e-catalog

- Free and user friendly 3D models downloading
- Powerfull search tool
- Technical data and wiring instructions

The smallest connector with removable contacts

- Shell size 01 with 3 contacts #26
- 20% smaller than a shell size 02
- For wires from AWG 24 to 30
