

77, 78, and 79 Series

The CTS line 77, 78, and 79 Series Filtered Assembly Plates provide ease of installation and line customization of standard size plates. Filter plates are an efficient and cost-effective solution for filtering multiple lines in to or between different system compartments.

For higher frequency applications (<50 MHz), filter plates can be more effective than typical surface mount solutions. The inherent shielding characteristics of these plates creates an effective RF barrier offering excellent insertion loss and isolation for frequencies greater than 5 MHz. The preassembled plates, which are 100% tested for critical parameters, greatly reduces the time and resources required to individually install solder mount filters.

The 77 Series Quick Connect and 78 Series Miniature Quick Connect filter plates (pages 2 & 3) feature a base plate with built-in installation clips. These clips allow for cost effective mounting into the system bulkhead without the expense or the time associated with traditional hardware. The Quick Connect filter plate offers one or two rows of totaling up to 26 lines.

The Miniature Quick Connect filter plate provides a lower profile and works with up to 10 lines. Up to 40 lines are available on the standard bolt-in filter plate in the two row configuration.

77, 78 and 79 Series Filter Plate Mechanical Specifications:

Base Plate Material	Copper Alloy or Nickel-Silver
Base Plate Thickness	
77 and 78 Series	0.012" [0.3mm]
79 Series	0.028" [0.7mm]
Plating	Matte Tin
Lead Material	Copper Alloy
Lead Plating	Gold Plate
Lead Diameter	Ø 0.025" [0.64mm]
Current Rating	5 Amps

Plate Style 77

77, 78, and 79 Series

CTS' Miniature Quick Connect Filter Plates offer the same ease of installation as the larger Quick Connect Filter Plates, while offering a low profile for limited area applications.

These Quick Connect Filter Plates are available in two lengths offering up to 10 lines with the longer plate option. Each line can be customized using the electrical characteristics in the table on page 5. If other special requirements are needed, contact Customer Engineering at 520-572-5056

Ordering Information

In order for CTS to establish the exact configuration required, please provide the following encoded description number as outlined below. A CTS part number will then be assigned to meet your specific needs.

The part number shown below represents the Quick Connect 1.812 length with two rows of seven lines per row. The filters are pi circuits with a capacitance value of 1000pF and straight leads. **7712-0707-SA**

77	1	2	-	07	07	-	S	A
Plate Style	Plate Length	Filter Type		Bottom Row*	Top Row		Capacitance Value**	Lead Configuration
77= Quick Connect 78= Miniature QC 79= Standard	See tables pages 2,3,4	C=1 π=2		Number of Filters	Number of Filteres		See table above	A= Sraight B= 90° Right C= 90° Left D= 90° Both

To request custom filtering, mechanical or material requirements not shown in this catalog, please contact Customer Engineering at 520-744-0400.

*When ordering a Miniature Quick Connect or another plate with a single row of filters use the designation for the bottom row in the part number and enter a value of 00 in the top row of the part number.

**To select different filter values please use filter letter X in description and provide CTS with a table showing where each Filter will mount.

Table Example:

A	A	S	S	S
A	A	S	S	S

77, 78, and 79 Series

The assemblies shown in this catalog have been designed and subjected to the following test plan as is applicable for the individual components. The information shown can be used as a basis for assembly specifications. For additional information or special requirements, please consult Customer Engineering at 520-572-5056

LOT ACCEPTANCE INSPECTION:

INSPECTION OR TEST	TEST METHOD PER MIL-STD-202 EXCEPT AS NOTED	POST TEST REQUIREMENTS
Visual and Mechanical	N/A	In accordance with applicable requirements.
Materials, Designs, Construction and Workmanship	N/A	
Physical Dimensions and Marking	N/A	
Capacitance	Method 305, 1KHz, 1 ± 0.2 VRMS max. +25°C	Within specified tolerance.
Dissipation Factor	Method 305, 1KHz, 1 ± 0.2 VRMS max. +25°C	4.0% max.
Dielectric Withstanding Voltage	Method 301, 2 seconds, 50mA max. charging current, 2.5 times WVDC.	No evidence of damage or breakdown.
Insulation Resistance	Method 302, 50mA max. charging current, 100 VDC, 2 minutes or as specified by individual variation.	Greater than 10,000 Megohms or 100 Ohm-Farads, Whichever is less.
Insertion Loss	MIL-STD-220, 50 Ohms, +25° C, no load	Per applicable requirements.
Solderability	Method 208	Per applicable requirements.

PERIODIC QUALITY CONFORMANCE INSPECTION:

A periodic component quality conformance inspection program consisting of environmental and reliability testing is in place to ensure that product integrity is consistently maintained.

CTS Online: www.ctscorp.com

The CTS Website provides visitors with a wide range of product and ordering information. The site is updated regularly and new features are continually being added. At www.ctscorp.com customers can view product information, download catalogs in .pdf format and view or link to Sales Offices, International Agents and Distributors.

An on-line request form allows customers to immediately specify product requirements and request information. CTS continually strives to improve and enhance its Web site with the needs of its customers in mind.

Solder Mount Feed - Thru Capacitors

4300 Series Miniature EMI Filters

These filters are ideal for applications where small size and high performance are critical. These C configured filters can be glass sealed on either one of the ends for optimal sealing between system compartments or components.

The gold plating on the leads offers excellent conductivity and connective ability using common gold bonding methods. The small package and large range of electrical characteristics of the 4300 Series make it an effective solution for a variety of microwave applications.

No Solder/Press-In C Filters

Press-In Ceramic EMI filters suppress unwanted EMI and allow a fast, mechanical bonding that is free from soldering. And, by offering an excellent alternative to the traditional soldering installation, these finely designed, knurled filters significantly reduce assembly costs.

These EMI filters cover a variety of voltage, attenuation and capacitance ranges in a press-in mounting style.

Product installation recommendations (X-2656/9) are provided with parts to prevent damage to the component during installation.

UL Recognized Filter Terminal Blocks

Application

Recognized by UL, Filtered Terminal Blocks are specifically designed to save time and money for EMI filtering applications. Combining a filtering component with an industry standard terminal block has created an effective barrier to EMI noise.

Filtered Terminal Blocks allow the engineer to eliminate EMI noise using an existing mechanical design concept. Our commitment to excellence and service allows for customization of the filtered terminal blocks to meet customer-specific EMC qualifications. Backed by decades of ceramic component production experience, CTS's Filtered Terminal Blocks will meet or exceed your application requirements.

Benefits

- Saves Labor and Space
- Consistent Panel Layout
- Solves EMI Problems
- Meets Specific Requirements

Features

- Filter Integral to Block
- Industry Standard Block
- Wide Range of Performance
- Customization

The CTS Terminal Blocks listed in this Catalog are Recognized to UL Standard 1283 for the EMI Filter and UL Standard 1059 for the Terminal Block.

Filtered Terminal Blocks

Practical Applications

- Telecommunications
- Computer and Peripheral Equipment
- Industrial Process Control Equipment
- Power Supplies
- Office and Lab Equipment

Filtered Terminal Blocks Specifications

1.0 Scope

This specification describes the basic performance requirements of CTS Filtered Terminal Blocks.

2.0 Capacitance

Measurement Conditions: Capacitance measured at $25^{\circ}\pm 2^{\circ}\text{C}$, 50% max R.H. and Frequency of 1 KHz @ $1\pm 0.2\text{VRMS}$.

3.0 Insertion Loss

- 3.1 Measurement Conditions: Insertion Loss values listed are measured in a 50W system at $25^{\circ}\text{C}\pm 2^{\circ}\text{C}$ under no-load conditions.
- 3.2 Insertion Loss: The Insertion Loss values listed are typical values for both 500 and 600 styles under indicated conditions.
- 3.3 Listed Insertion Loss data is a measurement of filter performance in a matched 50W system. It is highly recommended that filter performance be verified under actual circuit operation conditions.

4.0 Operating Conditions

Filters are designed to operate continuously at the voltage and current that is stated for each CTS corporation part number. If the operating ambient temperature is significantly higher than 25°C , the terminal blocks should be installed in equipment and tested under actual conditions to ensure that maximum temperatures are not exceeded.

5.0 Dielectric Withstanding Voltage

Filters shall withstand the specified voltage applied between the screw terminal and ground plane for one minute. Surge current shall be limited to a maximum of 50mA.

6.0 Insulation Resistance

Measured at $25^{\circ}\text{C}\pm 2^{\circ}\text{C}$ with 100VDC and charging current limited to 50mA max. The IR, after two minutes maximum application of the test voltage, shall be a minimum of 10 GΩ.

UL Recognized "Pi" Filter Terminal Blocks

CTS Part Number	Number of Terminals	Screw Size	A		B		C	
7602-501LF	2	#6-32	1.313	[33.35]	.437	[11.10]	1.710	[43.43]

7609-501LF	9	#6-32	4.375	[111.13]	3.500	[88.90]	4.770	[121.16]
7610-501LF	10	#6-32	4.813	[122.25]	3.938	[100.03]	5.210	[132.33]

Mechanical Specifications

- Center Spacing: .437 [11.10]
- Wire Size: up to 12AWG, Ø.081[2.06]
- Molded Material: High Temp Thermoplastic (PBT), UL rated 94 V-0
- Block Mounting: Recommended mounting screw (#8 Pan Head) Torque 5in.lbs. [0.56 Nm] Max.
- Terminal: Brass, Tin-plated

UL Recognition

- EMI Filters recognized to UL Standard 1283
- Terminal Block recognized to UL Standard 1059
- Reference UL File Number E201344

Electrical Specifications

- Operating Temperature: -40°C to 105°C
- Working Voltages: ≤ 250 VAC *
- Capacitance: ≥ 2000pF
- Dielectric Withstanding Voltage: 1500VAC *
- Insulation Resistance: ≥ 10 GΩ
- Current Rating: 20A
- DC Resistance: ≤ 10 mΩ
- Typical Insertion Loss[dB], in 50 Ω Circuit

10 MHz	100 MHz	1 GHz	10 GHz
5dB	50dB	60dB	65dB

(For additional insertion loss values, please contact the factory directly.)

* AC Frequency 50/60Hz

Mechanical Specifications

- Center Spacing: .437 [11.10]
- Wire Size: up to 12AWG, Ø.081[2.06]
- Molded Material: High Temp Thermo-plastic (PBT), UL rated 94 V-0
- Terminal: Brass, Tin-plated

UL Recognition

- EMI Filters recognized to UL Standard 1283
- Terminal Block recognized to UL Standard 1059
- Reference UL File Number E201344

Electrical Specifications

- Operating Temperature: -40°C to 105°C
- Working Voltages: $\leq 100\text{ VDC}$
- Capacitance: $2500/5000\text{pF}$
- Dielectric Withstand Voltage: 2121 VDC
- Insulation Resistance: $\geq 10\text{ G}\Omega$
- Current Rating: 20A
- DC Resistance: $\leq 10\text{ m}\Omega$
- Typical Insertion Loss [dB], in $50\text{ }\Omega$ Circuit

10 MHz	100 MHz	1 GHz	10 GHz
5dB	50dB	60dB	65dB

(For additional insertion loss values, please contact the factory directly.)

UL Recognized 30 AMP "C" Filtered Terminal

Please Note - Two screw sizes are available: The #6-32 (601) screw with combination head screw & clamp washer and the #8-32 (602) screw without clamp washer.

CTS Part Number	Number of Terminals	Screw Size	A		B		C	
		602						
7602-602LF	2	#8-32	1.313	[33.35]	.437	[11.10]	1.710	[43.43]
7603-602LF	3	#8-32	1.750	[44.45]	.874	[22.20]	2.150	[54.61]
7604-602LF	4	#8-32	2.188	[55.58]	1.311	[33.30]	2.590	[65.79]
7605-602LF	5	#8-32	2.625	[66.68]	1.748	[44.40]	3.020	[76.71]
7606-602LF	6	#8-32	3.063	[77.80]	2.185	[55.50]	3.460	[87.88]
7607-602LF	7	#8-32	3.500	[88.90]	2.622	[66.60]	3.900	[99.06]

7609-602LF	9	#8-32	4.375	[111.13]	3.496	[88.80]	4.770	[121.16]
7610-602LF	10	#8-32	4.813	[122.25]	3.933	[99.90]	5.210	[132.33]

Mechanical Specifications

- Center Spacing: .437 [11.10]
- Wire Size: up to 10AWG, Ø.102 [2.59]
- Molded Material: High Temp Thermoplastic (PBT), UL rated 94 V-0.
- Block Mounting: Recommended mounting screw (#8 Pan Head) Torque 5in.lbs. [0.56 Nm] Max
- Terminal: Brass, Tin-plated

UL Recognition

- EMI Filters recognized to UL Standard 1283
- Terminal Block recognized to UL Standard 1059
- Reference UL File Number E201344

Electrical Specifications

- Operating Temperature: -40°C to 105°C
- Working Voltages: ≤ 150 VDC
- Capacitance: ≥15,000pF Minimum
- Dielectric Withstand Voltage: 2121VDC
- Insulation Resistance: ≥ 10,000 MΩ
- Current Rating: 30A, (30A rating requires 10 AWG wire and lugs)
- DC Resistance: ≤ 10 mΩ
- Typical Insertion Loss, in 50 Ω Circuit (dB):

10 MHz	100 MHz	1 GHz	10 GHz
28dB	45dB	70dB	70dB

(For additional Insertion loss values, contact the factory.)

Product Installation Recommendations

The components in this catalog are manufactured with ceramic dielectrics. To minimize possible damage to the components during installation, contact us at: <https://www.ctscorp.com/contact/request-technical-info/> for more help and information.
