

20<sup>th</sup> April 2026

**Advance Notice of Planned CTS Line Shutdown in Korea**

Dear Distribution Partner,

We would like to inform you of a planned temporary shutdown at our Korea CTS production line to allow for important line modifications. This shutdown is scheduled from **July through September 2026**.

The following part numbers will be affected during this period:

- **WTF083B001**
- **WTF083B004**

To minimise any potential disruption to supply, we are proactively building inventory ahead of the shutdown. However, to ensure we can fully support your requirements without interruption, and taking into account the standard manufacturing lead times, we kindly ask that you provide forecasted demand or, preferably, purchase orders covering your needs for the period of July 2026 to January 2027.

**Requested Action:**

- Provide forecasts or POs for WTF083B001 and/or WTF083B004 through January 2027
- Please submit these by no later than May 31st, 2026 (or sooner if possible)

We are committed to minimising any disruption to supply during this period and will keep you informed of any changes to the schedule.

We apologise for any inconvenience this may cause and appreciate your cooperation and continued support.

Yours sincerely,

Sarah Williams  
Internal Sales Representative – Distribution

**For and on behalf of Philip Leach, Distribution Manager EMEA, Amphenol Sensors**
