2. Description of News				
We would like to inform you about the relocation of several Han® B bulkhead mounted housings (HBM) with metal lever (ML) from China to Vietnam. With this relocation to Hanoi, we will efficiently use our global production capacities and secure the supply chain for our customers out of China. This relocation does not impact existing production in Europe which will continue to support other regional areas.				
3. Implementation				
Production in Vietnam is planned to start April 2025.
