LF PCN# A0392 BF in Line Fuses change to Legacy status

Aug 11, 2026

Dear Valued Customer,

Littelfuse is changing the status of our BF In line products from 'Standard Material' to 'Legacy Material'. "Legacy" is the term Littelfuse uses to define materials that are still active for selected customers, but are phasing out of our Trade Product offering.

No change is being made to the materials – only the status is changing.

Impacts of change to Legacy status.

- No sales to new customers; no sales to existing customers for new applications. Sales are restricted to existing customers in on-going applications only.
- Materials removed from Catalog and Standard Price Lists
- Materials sold On-Quote only, and are no longer available on ITS or other material stocking strategy
- Reduction or removal of safety stock at Littelfuse distribution centers
- Materials may be removed from Global distribution centers for shipment only from manufacturing location
- Materials may change from Stock Item to Make-to-Order item
- Materials are high risk of obsolescence; no guarantee can be made for life-span of product.
- Materials will be available only in the Bulk Packaging
- Materials are not available for Samples

Please refer to attached list for impacted materials. (Appendix 1)

Please contact your local Littelfuse representative if you have any additional questions. We will be pleased to answer any questions you may have.

Thank you for your continued Support.

Sincerely,

Montserrat Mendoza

Associate Product Manager

Littelfuse Automotive Business Unit
