

Issue Date: Sept 18th, 2026

Dear Valued Customer,

This PCN 0649 notice is to inform you that, due to the discontinuation of one or more components used in the manufacturing of the products listed below, Littelfuse will discontinue the affected part numbers.

Description of the Change:

Littelfuse will discontinue the affected part numbers and place them into obsolescence.

Reason for The Change:

One or more components required to manufacture the affected products have been discontinued by our supply base and are no longer available. As a result, Littelfuse is unable to ensure the continued production of the affected part numbers.

Affected Part Numbers:

- 00226800
- 00226900

Effective Date of the Change:

This notification becomes effective on Sept 18th 2026. Available inventory is expected to remain available for up to 12 months from the effective date, subject to stock availability.

What You Need to Do:

Customers are encouraged to review their future requirements and place any last time buy orders as soon as possible. LTB orders will be accepted only while inventory remains available, and quantities cannot be guaranteed once existing stock has been depleted.

To verify current inventory availability or discuss your requirements, please contact your usual Customer Service or Inside Sales representative.

Littelfuse regrets any inconvenience this situation may cause and appreciates your understanding and continued support.

Sincerely,

Cristal Furini

Product Manager
Commercial Vehicle Products
