

PRODUCT CHANGE NOTICE

PCN 2026081 terminal 2701**Issue Date:** Augst 01, 2026

Dear Valued Customer,

This notice is to inform you of an update to a finish good you have purchased from Littelfuse.

Description of the Change:

Littelfuse will discontinue selected 651/652 Serie switch configuration utilizing .187 solder lugs, PC Terminals and wire angle termination. Part Numbers attached.

Reason for The Change:

As part of our product portfolio optimization and standardization efforts, Littelfuse is discontinuing these low-volume configurations and focusing on supporting industry-standard offerings, including .187 Tabs and the PC Right Angle Terminal option.

Effective Date of the Change:

Effective immediately.

What You Need to Do:

Please consider transitioning to the industry-standard switch. Datasheet with our current offering attached to identify the appropriate replacement part number and update future orders, as applicable.

If you have any questions, please contact your Customer Service or Inside Sales Representative. We appreciate your business and our continued partnership.

Sincerely,

Alex Toro

Associate Product Manager

Small-Sized Rocker Switches

PRODUCT WEBPAGE

request sample, configure part

This switch is ideal for applications with back panel size constraints. It fits in a standard rectangular cutout and is designed to provide ease of insertion along with superior panel retention qualities. A high profile rocker and butt-action contacts provide the user with a crisp positive-type feel. A variety of ratings, circuitry and termination choices will appeal to many market segments.
