Product termination notice for the MMJX1H40N150 (MOS gated thyristor in sSMPD package)

Dear valued customer,

Following a rationalization of its manufacturing footprint aimed at improving supply chain agility and service to our customers, Littelfuse announces the end-of-life (EOL) of the MMJX1H40N150, a MOS-gated thyristor in an sSMPD package.

• **Last-Time Buy:** A last-time buy opportunity will be available until November 20, 2026.

• **Supply and Order Acceptance:** While Littelfuse intends to fulfill as many orders as possible, fulfillment cannot be guaranteed due to potential constraints in material availability or manufacturing capacity. All orders are subject to formal acceptance by Littelfuse, which will be communicated through Littelfuse's standard order acknowledgment process.

• **Order Adjustments:** Littelfuse reserves the right to adjust delivery schedules or reduce or cancel order quantities, in whole or in part, based on supply availability and operational constraints. Littelfuse will communicate any such adjustments promptly.

• **Delivery Timing:** Littelfuse currently intends to complete final deliveries by the end of Q2 2027, subject to manufacturing schedules, capacity constraints, and material availability.

If no feedback is received by November 20, 2026, this notice will be considered acknowledged and accepted.

Please contact your Regional Sales representative of Field Application Engineer for any inquiry or further details.

Best Regards,
Francois Perraud
