

PCN

AO-PCN-2026-086-S

Alternative source - NanEye Black Painting

15.09.2026

Dear Customer,

please review this **PCN** and provide your feedback in the **Customer approval form** (at the end of this PCN document) to your ams OSRAM sales partner before **14.12.2026**.

Your prompt reply will help ams OSRAM to assure a smooth and well executed transition. If ams OSRAM does not hear from your side by the due date, we will assume your (if you are a Distributor: and your customer's) full acceptance to this proposed change and its implementation.

ams OSRAM understands the time requirements your organization needs to approve this PCN. However, if you can provide ams OSRAM an estimated date your organization will have finalized this PCN review, ams OSRAM can use this date to plan continued production to secure your order needs during the transition time.

Your attention and response to this matter is highly appreciated.

Please direct your inquiries to your local Sales office.

Subject of change:	NanEye alternative black paint
Affected products:	Q65114A3342 (NE2D_RGB_FOV90F4.0_NP_2mFT SE) Q65114A3340 (NE2D_RGB_FOV90_F2.7_2m FT SE) Q65114A3341 (NE2D_RGB_FOV120_F2.8_2m FT SE) Q65114A3383 (NEM_RGB_2M_FOV120_F4.0 FT SE) Q65114A3384 (NEM_RGB_2.5M_FOV120_F4.0 FT SE) Q65115A2322 (NEM_RGB_1.4M_FOV120_F4.0 FT SE)
Reason for change:	The primary reason for this change is the phase-out of PFAS-containing materials in response to increasing global environmental regulations and restrictions.
Description of change:	As part of our commitment to environmental sustainability and regulatory compliance, ams OSRAM would like to inform you of an upcoming material change affecting the adhesive material EK580 supplied by Everlight Chemical. Everlight Chemical will transition from the current PFAS-containing formulation of EK580 to a new PFAS-free, silicone-based formulation. This change is being implemented in response to increasing global environmental regulations that restrict the use of per- and polyfluoroalkyl substances (PFAS). Change Overview • Current formulation: Contains PFAS materials and is currently used in production. • New formulation: PFAS-free, silicone-based formulation developed by Everlight Chemical.
Time schedule for PCN material: (after implementation of change):	Everlight Chemical has communicated that production of the current formulation will cease, and only the PFAS-free version will be manufactured effective January 1, 2027. To ensure continuity of supply during the transition period, ams OSRAM plans to place a Last Time Buy (LTB) for the current formulation by December 4, 2026. This measure is intended to secure adequate inventory coverage through Q1 2027.

Note:

Pre-PCN material: Products of current status, means before implementation of the changes as described in the PCN.

PCN material: Products with implementation of the changes as described in the PCN.
