TTI INC. Team

Please refer below for SWS Change Notification.

- **Parts # Affected:** 6098-8887 new part number: 6099-1462
- **Description:** USHYBA20MACL-B1
- **General Description :** GM has requested a design change to the 20w door connector to improve robustness during vehicle assembly and reduce excessive MBS float. The change involves a modification to the male housing only, which will result in new male housing part numbers and a new finished good part number. Due to tooling complexity, this will be a one-way change; both versions will not be manufactured concurrently. Please refer to the attached Visual Change Document (VCD) for additional details. Exact dates for orders must be confirmed by SWS USA and SEWS business planning.
- **Reason for Change:** Design change is intended to reduce the risk of exterior connector features breaking during vehicle assembly. Improving connector robustness will help prevent breakage and enhance overall OEM assembly reliability.
- **Date of change proposed:** July 2026
