Description of Change: The following changes will be implemented for Vishay phototransistor optocouplers in DIL-4 and DIL-6 packages:

1. Replacement of existing molding compounds with Vishay Green molding materials to support environmental compliance and production harmonization.
2. Qualification and implementation of an alternative emitter die source, including an alternative qualified emitter coating material, to enhance supply chain robustness and harmonize production.
3. Conversion to internally manufactured detector chips processed on 6-inch wafers.
4. Reduction of bond wire diameter on both emitter and detector sides as part of process optimization.
5. For THT (DIP-4 and DIP-6) products, replacement of the current tube stopper (rivet plug) with a standard rubber plug to align manufacturing processes across production sites.

Reason for Change: Vishay is continuously optimizing its manufacturing processes to improve production efficiency, increase supply chain robustness, and support the transition to environmentally friendly Green materials for DIL-4 and DIL-6 optocouplers.

Due to the unexpected difficulties of molding compound deliveries to one of our subcontractors, the implementation of these changes must be accelerated to ensure uninterrupted product availability and maintain delivery capability. All new materials, components, and process modifications have been fully qualified prior to implementation and are already being successfully utilized in high-volume production for other Vishay products.

Expected Influence on Quality/Reliability/Performance: There is no change to the product form, fit, function, quality, reliability, or specified performance parameters. The datasheet minimum and maximum performance parameters will remain the same. Nevertheless, we request our customers to test the product in their specific application.

Part Numbers/Series/Families Affected: Please see materials list on the succeeding page.

Vishay Brand(S): Vishay Semiconductors

Time Schedule:

Start Shipment Date: Tuesday November 24, 2026

Sample Availability: Samples are available upon request.

Product Identification: Product can be tracked by date code.
