Description of Change: The affected part numbers listed in this notification will be moved to an AEC-Q200 and IATF 16949 qualified factory. The transferred parts will use a standard process / material set which changes the metal stack for the product. This will bring increased efficiency and increased capacity. The changes to the part number ordering nomenclature will be the replacement of IGBR Pd (“P”) and Ni (“N”) Backside Metal options with NiV/Ag (“S”) – See online datasheet comparison for details. The new ordering code IGBRxxxxxxxSAST, which has the same product performance, fit and form as the current IGBR product except for packaging which will change from wafflepacks to diced-on-tape format. There will be no changes to the specification limits at final test associated datasheet specifications.

Reason for Change: AEC-Q200 qualified factory and part numbers with increased capacity are replacing the discontinued backside metal options.

Expected Influence on Quality/Reliability/Performance: N/A

Part Numbers/Series/Families Affected: Please see materials list on the succeeding page.

Vishay Brand(S): Vishay Electro-Films

Time Schedule:

Last Time Buy Date: Tuesday October 6, 2026

Last Time Ship Date: Tuesday April 6, 2027

Sample Availability: Qualified samples of replacement product are available immediately

Product Identification: IGBRCxxxxxxxPCWS IGBRCxxxxxxxNCWS, IGBRCxxxxxxxNCTF

Qualification Data: AEC Q200 qualification data of replacement product is available. Qualification PPAP is available now.

This PTN is considered approved, without further notification, unless we receive specific customer concerns before Thursday May 7, 2026 or as specified by contract.
