

Dear Ladies and Gentlemen,

we would like to inform you about the latest status of the MYLAR issue.

The developments surrounding the closure of the MYLAR Specialty Films factory are unfortunately very dynamic and have changed almost daily in recent weeks.

Some points have now been clarified, although final clarity can only be expected in the coming weeks or months.

We can now provide you with the following new status after we finally received the confirmations from MYLAR as to which film quantities we will still receive for certain thicknesses.

With regard to the 'critical' items that we had sent you (those marked in red), the film on our stock for current orders is as good as used up.

P/O's that WIMA has received from 10 March 2025 onwards could only be accepted with a surcharge of 15% on the current price list prices once the raw material is available.

This surcharge is due to the extraordinary procurement costs for covering the remainder at less favourable conditions. Unfortunately, this retrospective surcharge was not foreseeable until the beginning of this week.

As the raw film material from MYLAR for the 'critical' articles has now been used up, we are unable to accept any further orders for these articles with immediate effect.

We are currently unable to conclusively assess whether we will be able to replace 100%, some or all of these items with an alternative film supplier on a 1:1 basis.

Should the case arise that these articles can no longer be replaced 1:1, we will offer alternatives with available film material, which will be slightly larger in terms of dimensions.

PCNs will then follow. We hope that these can be send in May.

No longer available to order for the time being, as no additional raw material is available:
