## Changes for Specific Models of JB Series Low Profile Process Sealed Tactile Switches

Type of Change:

- Engineering     Part Number
- Product         Appearance

There will be changes to the top of the switch case for specific JB Series low profile process sealed tactiles. The top of the case has a round concave impression in one of the corners, and an identical impression will be added in the diagonal corner of the case. This revision will apply to nonilluminated models with a flat blue button or short actuator, with straight PC terminals, and to illuminated models with a short actuator. Both categories will include standard and custom part numbers. Effected standard part numbers are displayed on page 2.
