General Product Description:
Crosslinked product families including Wire & Cable, Heat Shrink Molded Shapes & Tubing, and Heat Shrink Devices

Description of Changes
Dear Valued Customer, this notice informs you that due to a vendor enforced change to a raw material, TE Connectivity is replacing a cross-linking additive with a drop-in, like-for-like alternative (same CAS Number). Based on internal testing, there will be no impact on the fit, form, or function of the finished product. The replacement additive will be phased into production as relevant approvals are obtained. As a result, there will be a transition period during which shipments may contain products manufactured using either the existing additive or the new additive. TE will maintain full traceability to be able to identify the additive used in the supplied customer product.

Reason for Changes:	
Part status change.The supplier of the additive, Mitsubishi Chemical Group (MCG) announced that the manufacturing of products from their plant will be discontinued in stages starting in March 2026 and fully terminated by the end of March 2027.
