TE Connectivity

Product Change Notification: P-26-030092

PCN Date: 09-APR-26

Customer: TTI Inc (168830)

Location: Fort Worth

Agreement: Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

RT-780 heatshrink tubing and -780 molded part discontinuance

Description of Changes

This notice informs you that TE Connectivity is discontinuing the RT-780 heat shrink tubing and molded shapes with effect from 10th July 2026. RT-780 heat shrink tubing and molded shapes are designed to seal and protect wire and harness looms. The products are made from a chemically resistant cross-linked fluoropolymer designed to withstand nuclear, biological and chemical contamination, and decontamination agents. Unfortunately, we have recently been informed that a key raw material used by TE Connectivity to make the compound for manufacturing the tubing and molded shapes has been discontinued by the supplier. There is no alternative raw material that will give the same or better product performance.

Reason for Changes:

Part status change. Following a thorough review, TE Connectivity has made the difficult decision to discontinue the RT-780 tubing and molded shape product range. This will come into effect 10th July 2026. A last time buy may possible for orders placed before the 10th July, but only while stock lasts of the raw material, and you will need to discuss the requirement with Product Management before any last time buy can be agreed. For assistance with alternative products, please contact our Product Management team. We understand this product discontinuance may impact your operations, and we appreciate your understanding. We are committed to providing you with alternative solutions and support during this transition.
