TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Composite Circular connector ACT series & specials intended for aerospace, defense, and marine applications. These produ

Description of Changes

Notification only An update is being implemented to the applicable product specification (108 series) and associated customer drawings. This update redefines the documented performance requirements by explicitly identifying the set of validated parameters supported by available test data and qualification records. References to external standards are being clarified to avoid implicit assumptions of full compliance where complete qualification data is not available. The revision includes: -Clarification of performance requirements explicitly supported by existing validation data -Removal of implicit or assumed requirements not directly substantiated by current test records -Alignment of specification language with the documented scope of verified product performance -Update of associated customer drawings to reflect the revised specification content No changes are being made to product design, materials, or manufacturing processes as part of this revision.

Reason for Changes:

Document clarification. Due to the lost of QPL in 2023, TE wants to clarify and align the documentation product performance of ACT commercial series & derivatives with available engineering data and validated test results.
