TE Connectivity

Product Change Notification: P-26-031531**PCN Date:** 22-SEP-26**Customer:** TTI Inc (168830)**Location:** Fort Worth**Agreement:** Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

PN 3-1616190-2 - Additional Material Hardness

Description of Changes

TE lower level PN 3-1616190-2 drawing will be updated to include both the H02 and H04 temper for the brass material callout. Currently, the drawing allows for only the H04 temper.

Reason for Changes:

Product improvement. Due to limited availability of Full hard brass, TE sub-tier supplier would like to utilize available Half hard brass. The hardness of this lower level part is not critical to the affected end products, as this component is used solely to fasten lower level non structural assemblies. Based on the above, this change will not impact the affected top level drawings or end-items, only this lower level component.

Estimated Dates:

Last Order Date (Obsolete Parts Only):	First Date To Ship (Changed Parts Only):
	24-NOV-2026
Last Ship Date (Obsolete Parts Only):	Last Date for Mixed Shipments: (Changed Parts Only):
	No Mixed Shipments
