TE Connectivity

Product Change Notification: PCN-26-276659

PCN Date: 18-MAY-26

Customer: TTI Inc (168830)

Location: Fort Worth

Agreement: Agreement Unknown

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

Product Description: (Text limited to 120 characters)
Fortis LRM Screw T8 Six Lobe Drive

General Description of Changes
TE is making dimensional changes to screw part number 2226170-1 to improve fit within guide module assemblies and aid in immobilization of the guide module keys. The screw will now feature an undercut section below the base of the head to support the key retention function. In addition, the screw drawing is being updated to add two part numbers to account for separate processing steps (machining, passivation, and threadlock patch application). Previously, all processing steps applied to part number 2226170-1; moving forward, 2226170-1 will be as machined only, with all additional processing applied to 2226170-3. Machining of the screw will be insourced from an outside supplier to an internal TE facility.

Reason for Changes:
The original screw design allowed slight guide module key movement, which was unacceptable in some applications. TE resolved this by adding an undercut below the head. This change is an improvement only; major dimensions remain unchanged and compatibility with existing field assemblies will be maintained. The manufacturing facility is under a certified quality management system, and a first article inspection will be completed prior to delivery.
